Impact of Covid-19 pandemic on disabled workers' survival in Italy and future scenarios

©Italian National Institute for Insurance against Accidents at Work

This presentation has been prepared for the 2023 International Congress of Actuaries.

The Actuaries Institute Australia Council wishes it to be understood that opinions put forward herein are not necessarily those of the Institute and the Council is not responsible for those opinions.

Economic benefits

Asbestos Victims Fund

Asbestos is one of the most important occupational carcinogens, causing about half of the deaths from occupational cancer.

In 1992 Italy prohibits the extraction, import, use, marketing and export of asbestos and products that contain it.

Since 2008, Inail manages **Asbestos Victims Fund**. The aim of the Fund is to provide additional financial support to the diseased to enable higher levels of care.

A special insurance protection for special workers: housewives/househusbands

Domestic accidents are a topic of great interest for public health. The low security level of domestic environments and the low perception of risk represent an important risk factor.

The aim is to provide a **high risk insurance coverage** to the housewives and househusbands who daily free of charge take care of their own family unit and the home environment where they live. The housewives and househusbands are equated to other workers and the insurance protects their job.

The insurance was born on 1 March 2001 and it is the first in Europe. From 1/1/ 2019 the insurance has been deeply transformed increasing the insurance coverage.

Thank you!
